03- About the Company

05- Vintjärn/Kölen

09- Gravberg 1

12- Market and Infrastructure

15- Management

16-Contact

Our purpose

The world is facing the biggest change of energy in the history. To cope with this green transition that is taking place, more resources are needed than ever before for metals and clean energy.

Our focuses

Iron

Iron is the main ingredient used to make steel. Today is it possibly to make “green steel” which increases the demand for iron.

Copper

Copper with high conductivity is used in most electronics today as phones, cars and telecom.

Hydrogen

Hydrogen is a clean energy used for both industries and cars. This energy gives zero in environmental emissions.

With the goal of extracting ore completely green

Vintjärn/Kölen

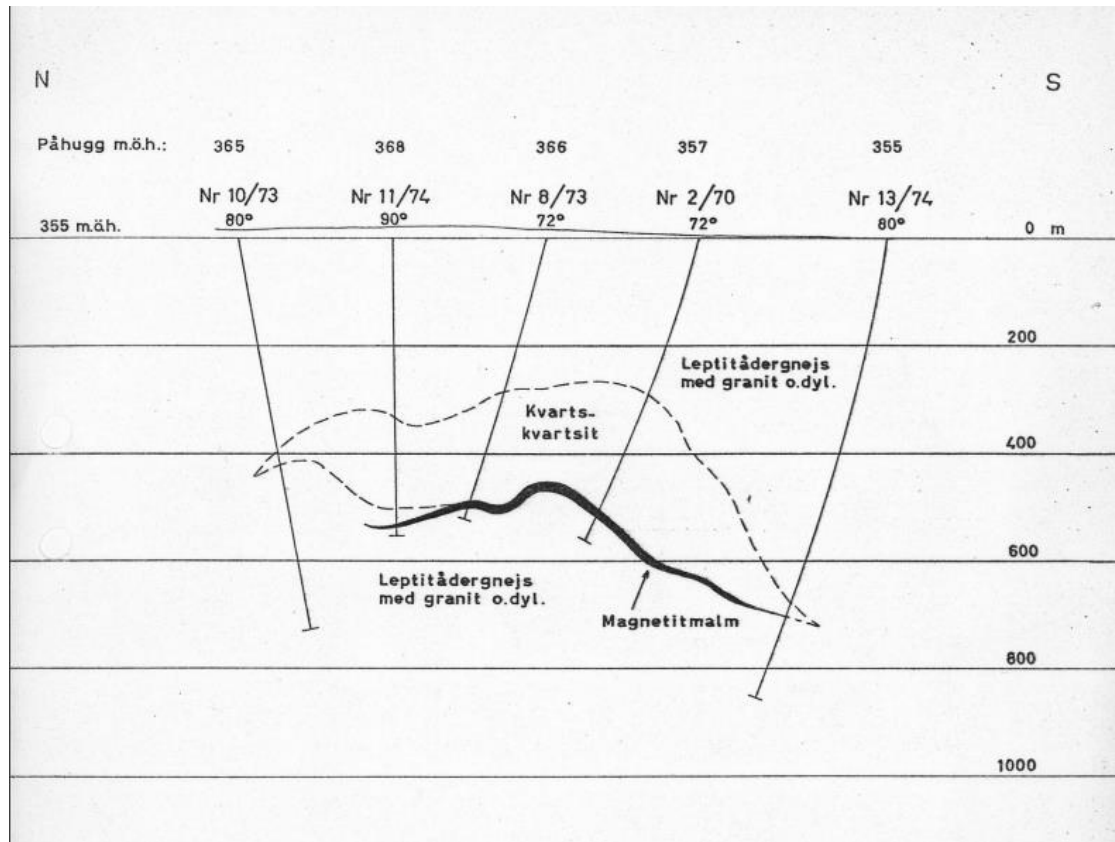

What we know

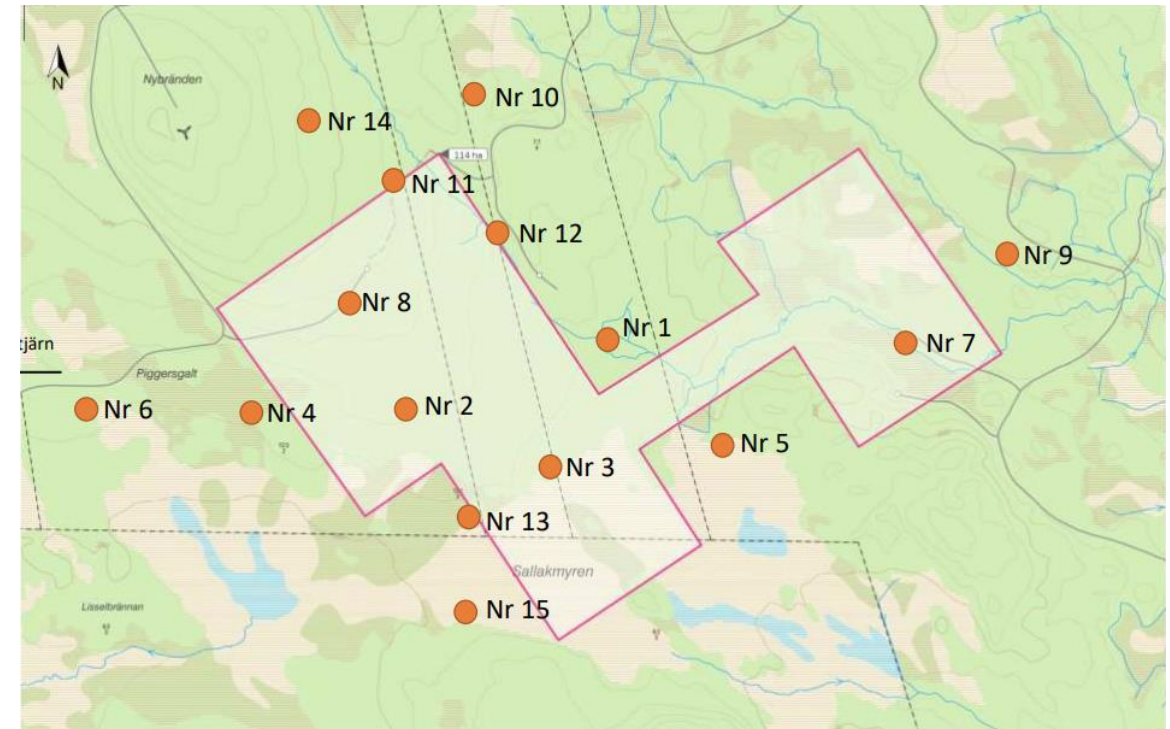

Studies from Sweden's Geological Survey shows:

- 70 Mton ore within the area
- Iron, copper, manganese and silicon
- 15 core drilling completed

Core drilling holes and cross sections

Extracts of the cross sections

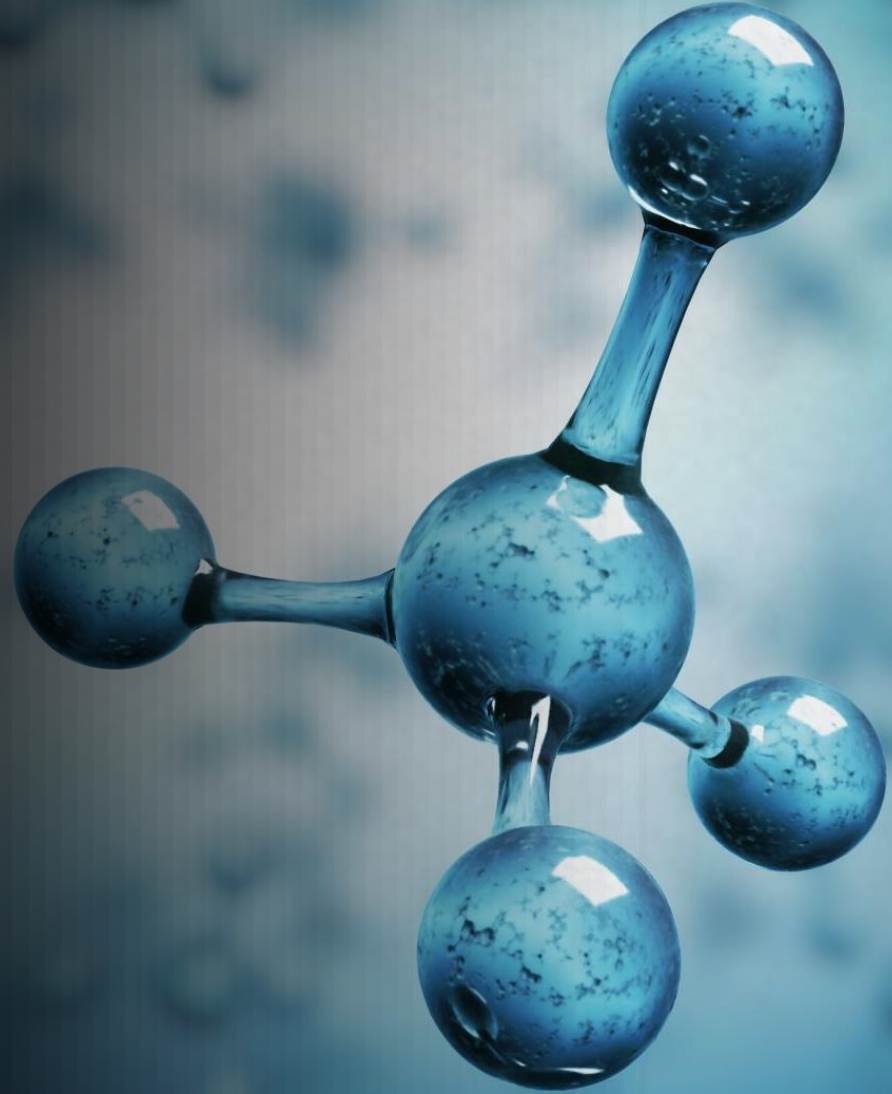

The company has submitted supplements over all 15 boreholes.

What's next

The company has closed the cape between Vintjärn and Kölen, distance of 7km (total 600 hectare)

Geological surveys (magnetic and electric) will be made to test the extent of the deposit

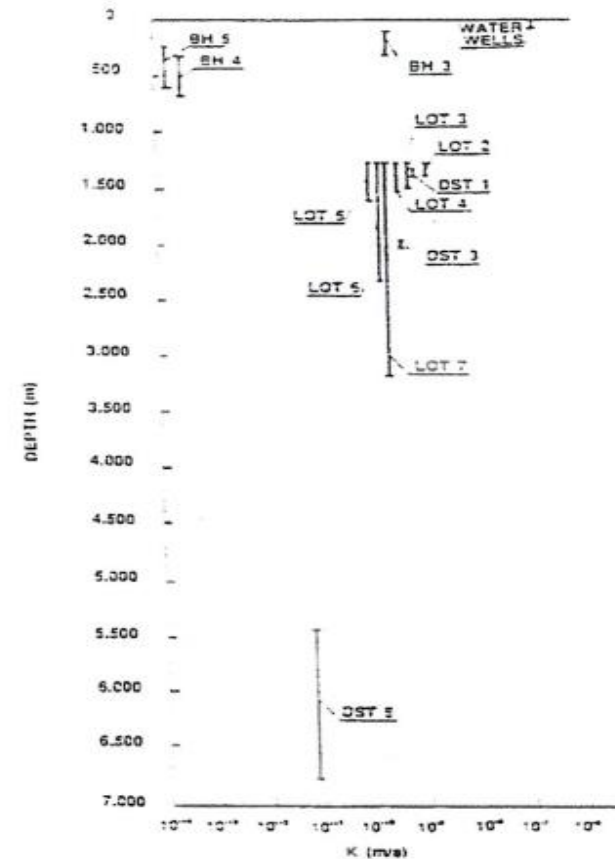

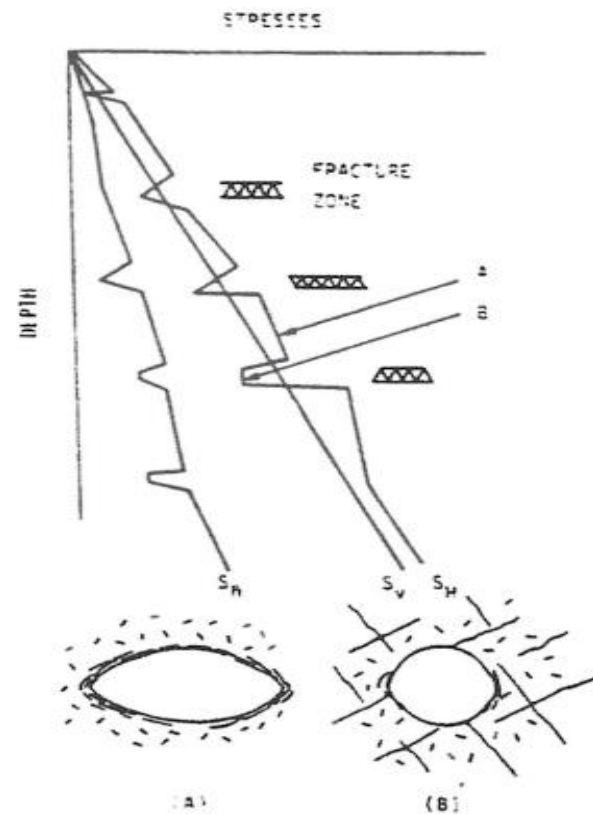

Hydrogen without electrolysis

Gravberg 1

- Located in Orsa municipality, Dalarna County
- Contains one borehole, drilled in 1980's and a TD of 5666 meter
- 13 interesting zones
- The formation water at a depth of 5200 meters is stated to be 89 degrees Celsius
- Reports shows steady flow of hydrogen and helium during the drilling
- Possibility to use the hot formation water for electricity production

Breakouts and Hydraulic conductivities

The background is a blurred image of a financial document. It features a line graph with a jagged, upward-trending line. A pen is visible in the upper right corner, pointing towards the graph. There are some numbers visible on the chart, such as '2.5' and '2.47'.

Market and infrastructure

Prices

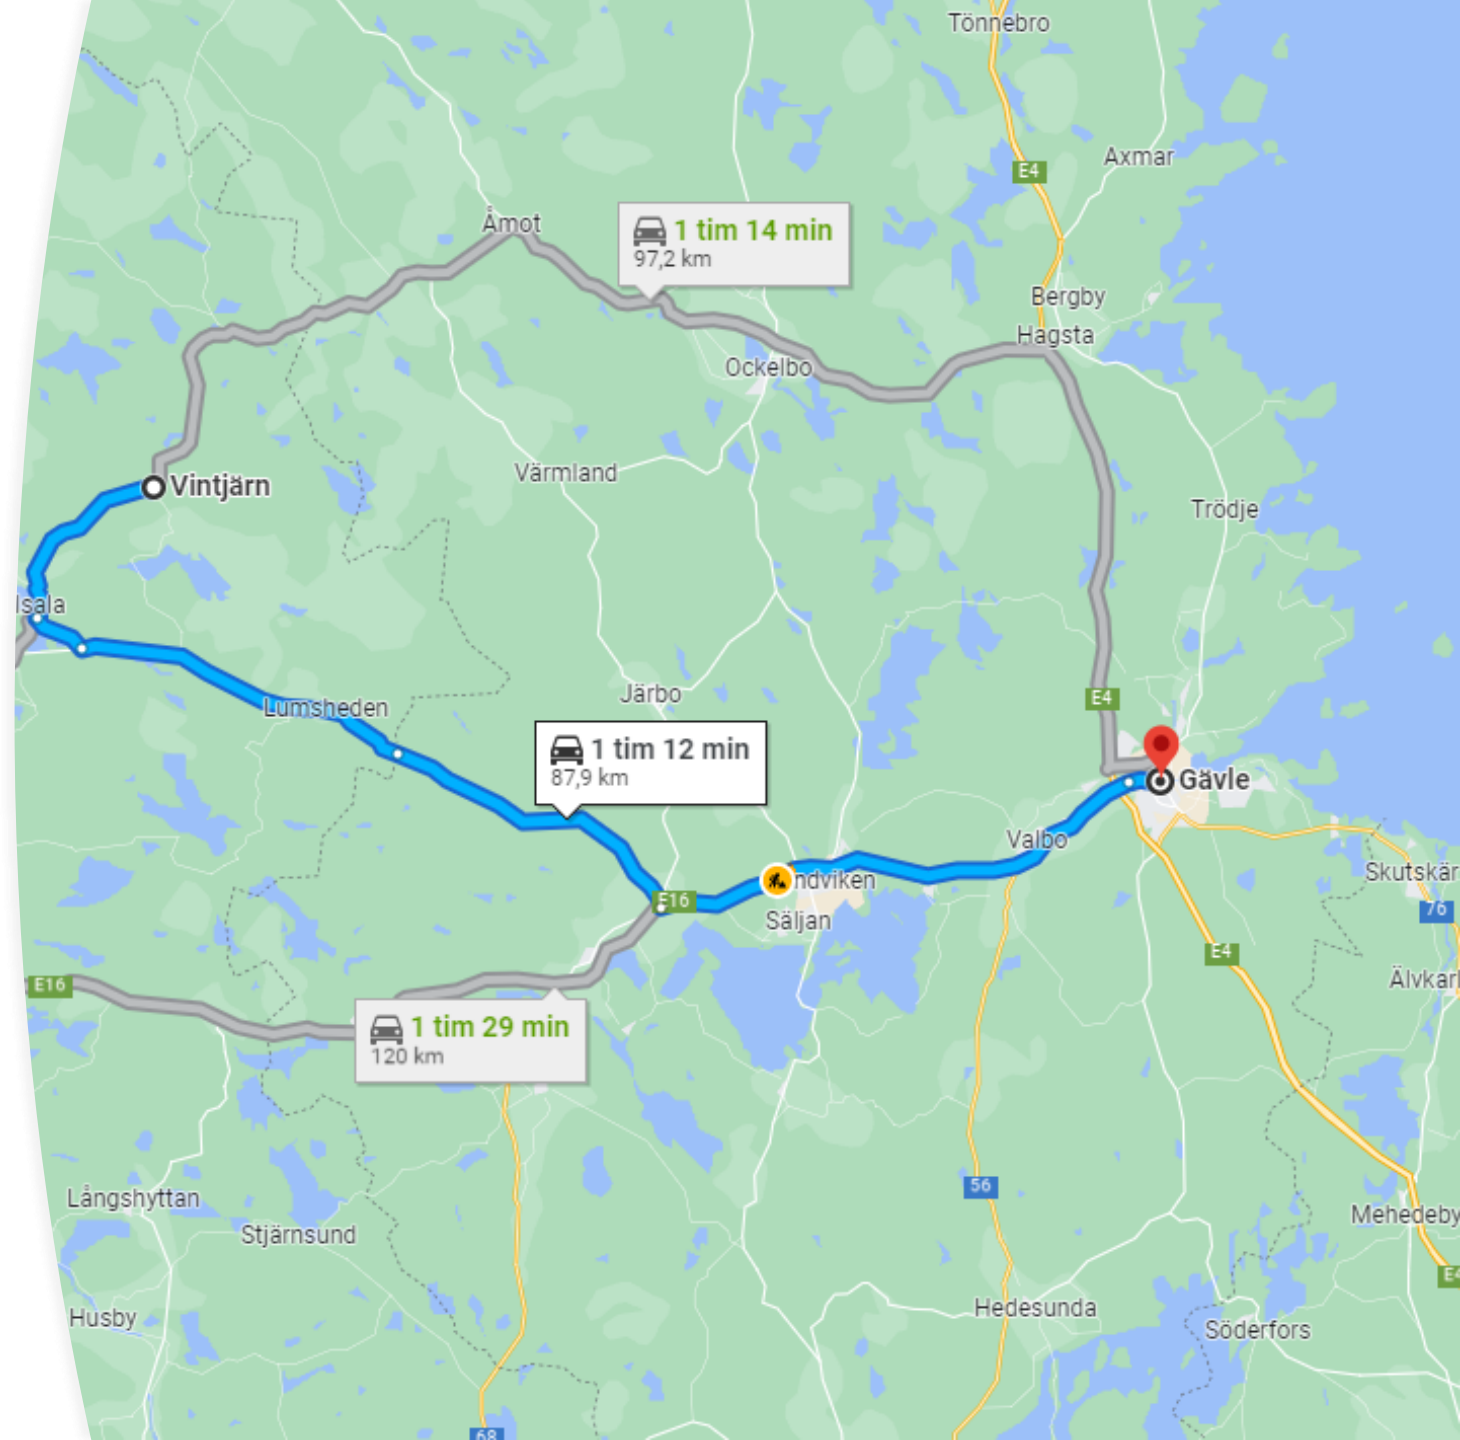

Raw material	Prices
Iron	131,92 USD/ton
Copper	9 477 USD/ton
Hydrogen	11,26 USD/kg

Prices from "London metals exchange" (20/5-2022)

Connections

- Distance to a deep harbor is 88km from Vintjärn
- Within the area there are roads with capacity for heavy transport
- Stable electricity network exists

Management

Ulrich Andersson
Chairman Of The
Board/Founder

Born in year 1966, Ulrich is a well-known entrepreneur in the raw material business. He has been involved in leading several companies to the stock exchange with great success.

Alexander Andersson
CEO/Co-Founder

A young entrepreneur born year 1998, Alexander has university education in economy and experience working out on permits both in the mineral sector and the oil&gas sector. Already CEO of "Big Rock Exploration AB"

Carl-Adam Andersson
Board Member/Co-Founder

Born in year 1992, Carl-Adam has a degree in international economics from Australia. Co/Founder for several companies and CEO of "Holmasjön Prospektering AB"

Rune Åslund
Drilling/Exploration
Manager

Born in year 1951 has very long experience of drilling internationally and high knowledge in this area.
